PROJECTS

WESTERN RECREATION CENTER STATISTICS

Jan 2017 to Present

- Plans on partnering with the Western Strength community to integrate WRCStats into their website
- Uses the Twitter API to parse Western University's Rec Center page for headcount data and generates graphs to aid students in finding ideal workout times
- Accumulated **3.4k** users in the first week of deployment
- Built using the MEAN software stack

FACETAG CREATED AT NHACKS

Mar 2016

- Won Most Promising Future Startup
- Facetag is an android app that uses Kairos facial recognition API to exchange users' social media accounts
- Implemented camera functionality/image processing for use with facial recognition API, and worked on app frontend development
- Promoted app by offering a captivating, informative business pitch for sponsors and judges
- Camera backend and app frontend programmed using Java and XML in Android Studio IDE

CUPRIC

Nov 2016 to Present

- Social media sharing platform where users can post their outfit pictures to share with other streetwear and fashion enthusiasts
- Plans on adding user upvote/comment functionality and standard DMCA takedown administrative utilities
- Built using the MEAN software stack
