Professional Experience

Software Developer II

Konrad Group – Toronto, ON (2019 – present)

- Developed an e-commerce iOS app with over **284K** monthly active users for a Canadian household name brand
- Used UIKit and RxSwift to build UI, and integrated both RESTful and GraphQL APIs
- Implemented product viewing and checkout flows which generated over **\$34M** in revenue within 2 years
- Built key features such as: Apple Pay support and biometric authentication with token refreshing
- Added features requested in user reviews, earning an App Store rating of **4.7** at **39K** reviews and **#20** in Shopping

Software Developer

IBM Spectrum Conductor – Markham, ON (2017 – 2018)

- Designed and developed management tool for integrating Anaconda packages into product using AngularJS and Java RESTful API
- Resolved potential security concerns generated from codebase vulnerability scan report
- Debugged and resolved product defects while working closely with QA team
- Created and implemented testing plans for various new product features

Projects

Western Recreation Center Statistics (2017)

- Used the Twitter API to parse Western University's Rec Center page for headcount data to generate graphs aiding students in finding ideal workout times
- Accumulated **3.4K** users in the first week of deployment
- Built using the MEAN software stack

Skills
